\*\* Ionisation system which reduces particles as well as fine and ultrafine particles in the air.

# PROFILE

In the space of 60 years, Interparking has become a European leader in the urban mobility sector. As well as offering comfortable and secure car parks, we are growing a range of innovative products and services that meet the needs of major European cities. Every day, our teams help to facilitate travel in urban centers and surrounding areas, focusing on three strategic priorities:

- continuous improvement in the **quality** of our services;
- an innovative offer of **mobility** solutions to meet the challenges of cities;
- an **environmentally**-responsible policy.

Interparking relies on a strategic presence in 9 European countries: Belgium, the Netherlands, France, Germany, Austria, Italy, Spain, Poland and Romania. We provide our clients with 933 sites, representing a total of 383 088 spaces across the European continent. If you were to line up all the vehicles parked in our parks, the queue would stretch almost 2 000 kilometers!

Our innovation and expansion strategy is reflected in the figures. In 2018, the Interparking Group generated a turnover

of more than **€464 million, representing an EBITDA of €143 million**. Each year, our portfolio of car parks grows, with new projects, acquisitions or renovations that are not only appealing for cities and our customers, but also garner the approval of third parties. To date, Interparking - a member of the European Parking Association and a number of national parking federations - has obtained 198 European Standard Parking Awards. These certifications acknowledge the hard work of our teams and show our customers that they have made the right choice.

2018 was also a crucial year for the roll-out of the Interparking **digital experience**: in each country where we operate, you can now book a space, take out a subscription or order a Pcard+ via our digital channels. The next step in our digital strategy will be for the Pcard+ to go dematerialized.

## SMOOTHER TRAVEL

Offering comfortable, accessible parking spaces located close to strategic hubs helps to improve the flow of traffic within cities. By doing so, Interparking is positioned as a fully-fledged **player in the mobility policies** of major European cities.

In addition to offering parking spaces, we are developing a comprehensive range of services aimed at making **life easier for public road users**:

- a digital experience in the 9 Group countries;
- car parks connected to public transport stations;
- innovative and safe solutions for cyclists;

**383 088**

**SPACES**  
291 560 OFF STREET  
91 528 ON STREET

**SERVICE**  
A WIDE RANGE OF  
SERVICES OFFERED

- flexible payment methods;
- cutting-edge technologies to make life easier;
- services tailored to new modes of mobility, such as electric vehicles and car sharing;
- a warm welcome that focuses on human contact;
- pricing adapted to the level of service and customized invoicing for business clients;
- etc.

### OUR ENVIRONMENTAL RESPONSIBILITY

At Interparking, we are convinced that every company must **contribute to a healthier environment for all**. The environmental impact of each new project is examined meticulously, to favor the least polluting solutions such as LED lighting. We also encourage environmentally friendly modes of transport, in particular by developing suitable spaces for car sharing or by providing charging terminals for electric vehicles.

Interparking has positioned itself at the cutting edge of the fight against climate change by becoming the first company in Belgium to take out a green loan where the total cost is linked to environmental performance criteria. Our Beffroi parking is actually one of the first car parks in Europe to be

equipped with ENS technology to eliminate fine and ultrafine particles. Furthermore, by reducing our electricity consumption and supporting CO<sub>2</sub>-reduction projects in emerging countries, we have managed to offset all our carbon dioxide emissions. This approach means that we are certified as a “CO<sub>2</sub>-neutral company” in all the countries where we operate.

### PARTNER TO MOBILITY PLAYERS

Maintaining a regular dialog with all our stakeholders is essential in order to stimulate innovation, respond to new societal needs and reinforce our position in a highly competitive market. To **imagine the mobility of tomorrow**, we constantly consult our institutional customers, daily road users, the public authorities and local residents.
